

Grants awarded under the Armed Forces Families Fund: Research Grants programme 2023/24 – November 2023

3 grants totalling £169,623

Organisation	Project Title	Grant Amount (£)	Project Description
England			
Bath Spa University	Early Years and parental deployment	49,729	This project will explore the impact of parental deployment on the wellbeing and educational experiences of UK Service children aged three- to four-years from Naval, Army and RAF families. The research project will explore effective policies and practices for these children and illuminate areas in which this may be developed.
Oxford Brookes University	Supporting all to thrive	60,000	This project will greatly enhance understanding of how Service life affects the educational outcomes and experiences of children with Special Educational Needs and Disabilities. It will provide evidence and recommendations for policymakers and practitioners to better target resources and improve support, ensuring all Service children and families thrive.
University of Chester	Service children's transitions in education.	59,894	This project will investigate the educational risks and benefits associated with service children's transitions. It will explore the lived experience of Service parents and children in conjunction with investigating the challenges associated with transitions with a view to determining in what ways educational risks can be mitigated.
