

Grants awarded under the Fulfilling Futures programme 2024/25 February 2025

6 grants totalling £852,187

Organisation	Project Title	Grant Amount (£)	Project Description
England			
Service Dogs UK	New Training Hub in Buckinghamshire	£37,588	The Hub will provide a dedicated space where Armed Forces veterans with PTSD can come together in a supportive environment, be paired with and train their assistance dog in a group alongside other veterans with similar complex needs, reducing isolation, improving their wellbeing, building connections and sharing their recovery journeys.
The Bridge for Heroes	LGBT+ Veterans Voice	£73,129	This project will support LGBT+ veterans, families and carers, and other minority groups, such as female veterans, in the East of England. By improving awareness, providing targeted services, and building connections with existing veteran organisations, the project will address specific needs, reduce isolation, and ensure long-term integration of support within veteran services.
Turn to Starboard	Project Vitamin Sea	£50,000	Through project Vitamin Sea, Turn to Starboard will offer tailored, healing and recovery themed sailing retreats for women veterans with trauma-based mental health challenges, directly linked to experiences of Military Sexual Trauma (MST). This project has been developed and will be run in collaboration with charity, Salute Her UK.

Northern Ireland			
Defence Medical Welfare Service	Improving NI Veterans' mental health	£298,470	DMWS will support Veterans with special consideration and their families in Northern Ireland to access the mental health support they need. Providing clinical support through Registered Nurses, this new approach will help Veterans and their families to manage complex mental health conditions such as PTSD and fulfil their futures.
UK Wide			
We Are With You	The Rebuild Project	£93,000	The Rebuild Project is a women-centred pilot initiative designed to support women veterans who are facing challenges with drugs and alcohol, while also addressing trauma related to their experiences in the Armed Forces. The project will include evidence-based clinical therapy alongside broader drug and alcohol support.
British Limbless Ex-Service Men's Association	Therapeutic Activities for Limbless Veterans	£300,000	Blesma will deliver a new, three-year therapeutic wellness programme to support limbless and injured veterans. Activities, support, and coaching/mentoring opportunities will break down barriers and help individuals progress positively through their recovery. This will reduce isolation, and improve quality of life, while supporting sustainable connections with the wider Armed Forces Community.
