	Supporting Partners Programme evaluation tender: clarification Q&A	
	Clarification question	Response
1	Do you already have a Theory of Change or logic model for the programme that outlines the kinds of outcomes that it is expected to deliver? (I realise some of these are mentioned in the tender document, but any further details would be much appreciated)	There is no Theory of Change for the programme or the evaluation
2	What reporting information have you gathered from the grantees of the programme? Is it in a structured format and are you able to provide either a blank form or an example of a completed form to give us a feel for what's captured?	We have gathered reporting information from grantees using a structured format. This includes details on project delivery, outcomes achieved, challenges encountered, and feedback from beneficiaries. The format also allows grantees to reflect on learning and adaptations made during the funding period. The reporting is collected via a standard template to ensure consistency across submissions. Data will be shared with the successful bidder.
3	Did you have any kind of standardised outcome framework for grantees?	No
4	How many projects were awarded funding under the 2025/26 round?	Funding decisions were made at the end of September. Information on these awards will be available on the Trust's website in due course.
5	Is the ten page limit for the technical question responses only? Are all other requirements ok to go in the appendices?	Yes, responses to the technical questions are within the 10 page limit.
